

Who is WHO?

DID YOU KNOW THAT ...

- ... the World Health Organization (**WHO**) will intervene directly in your life in the event of a health emergency in the future and thus bypass our rule of law?
WHO is working with its donors on a pandemic treaty and an amendment to the International Health Regulations (IHR).
- ... the head of the **WHO** will be able to tell you in the future what you have to do, where you are allowed to stay and which pharmaceutical products you have to pay for and take?
When a global health emergency occurs, the Director-General of the WHO alone says (Art. 12 Z1 IHR) and this does not end until the Director-General wants it.
- ... You can't defend yourself against it because there is no official body that supports you – neither in our country nor at the **WHO**?
According to the new contracts, a decision of the Director-General cannot be appealed by anyone. It is difficult to prove something that is not present in the contracts.
- ... our government will have to meet the requirements of the **WHO** (lockdown, vaccinations, etc.) in the future?
Our country must comply with the regulations of the **WHO** (Articles 13A, 42) by undermining the rule of law.
- ... that our politicians do not have an active say in who will give you what instructions?
While international corporations, lobbyists, foundations and the EU Commission negotiate the treaties together with the **WHO**, the national governments wait to implement what others have decided.
- ... the **WHO** can choose which products to use on the basis of the new treaties? Competing products from other manufacturers and nations are not bought.
In the context of a health emergency, free competition is abolished. The **WHO** thus has a direct influence on the economy.
- ... neither we citizens nor our governments can elect the Director-General of the **WHO** or influence the projects and goals?
WHO's goals are determined by earmarked contributions, which account for 80% of the **WHO** budget. The donors, often investors, thus determine the work of the **WHO**.
- ... the politicians will probably approve the final regulations just as unquestioningly, since they are already not negotiating in the interests of the citizens?
Our politicians will vote on IHR and pandemic treaty in the World Health Assembly in May 2024. The IHR will automatically enter into force one year later, unless our country vetoes it. The pandemic treaty must be implemented within 1.5 years.
- ... Your freedom to travel in the future will depend on the current requirements of the **WHO**, as it can determine whether and where citizens are allowed to travel?
The European Commission and the **WHO** agreed on a global health certificate, which, like the COVID certificate, will determine travel opportunities.
- ... the **WHO** prescribes what you are allowed to learn and discuss with others, since the constitutionally enshrined freedom of the press and freedom of expression is to be suspended?
The **WHO** equates information with pandemics („infodemic“), which are to be controlled.

You don't believe it?
